Subject: Northbench project

When the idea of wineries began many years ago, we were in favor of the vineyards but never would we want tasting rooms in the middle of residential neighborhoods. The northerbench is quite and filled with children and horses, it's a lifestyle everyone purchased long ago! We think it's reckless of our city to force this upon good folks that have lived in these home for some 30yrs!

We believe the city should respect the General Plan that we, who have lived here for decades, agreed upon those many years ago. Our little valley and town cannot endure more cars on the roadways, which the city isn't maintaining even now!

Please do not approve this project. Here the cries of your good citizens that have enjoyed their lives in our rural community for many years.

Thank you for your consideration,
Gary and Diane Sweitzer
